

# SECURITY OPERATIONS CENTRE

Trident SOC powered by Neptune Cyber Security Services

The Security Operations Centre (SOC) is a secure facility from which your information systems (web sites, applications, databases, data centres and servers, networks, desktops and other endpoints) are monitored, assessed and defended.

## Why do you need it?

The Education sector is the most cyber-attacked industry in Australia<sup>1</sup> and was 4<sup>th</sup> on the list of Australian Notifiable Data Breaches in the last QTR of 2018<sup>2</sup>.

Let the experienced and certified team from Trident SOC

- ⊗ Provide real-time security monitoring for your users
- ⊗ Deliver deeper understanding of network activity
- ⊗ Add a preventative layer to your protective security strategy
- ⊗ Minimise exposure and risk through advanced threat protection
- ⊗ Help protect your data and your brand

Contact the Trident team to arrange a free security consultation.

<sup>1</sup> According to the NTT Security 2018 Global Threat Intelligence Report.

<sup>2</sup> Notifiable Data Breaches Quarterly Statistics Report: 1 October – 31 December 2018
